

*Amendments to the Specification*

Please replace the paragraph beginning on page 3, line 13, with the following amended paragraph:

To achieve the above object, there is also provided a color CRT in accordance with a fourth embodiment of the present invention having a panel of which outer surface is substantially flat and inner surface has a predetermined curvature and a funnel coupled to a rear side of the panel, in which the center transmittance of an effective surface ( $U$ ) of the panel is 45% ~ 75%, a diagonal size of the effective surface is 650mm ~ 700mm, and a following condition is satisfied:  $-17.746 \cdot \ln(U) + 116.49 \leq (R_h \cdot R_v \cdot R_o) / U \cdot T_c \leq -20.322 \cdot \ln(U) + 133.45$ .
